

Week 14 Properties of Ecosystems: **Animal Defenses**

1. What are 3 main ways that animals try to defend themselves?
2. List 3 ways that animals can trick their enemies into leaving them alone.
3. How do some eels protect themselves?
4. Why do you think animals prefer to run away or frighten off enemies rather than fight?
5. Why do many animals prefer trickery to running away?
6. How might a defense also serve as an attack method?
