Five sentences have been removed from the article below. For each question (1-5) choose the correct answer (a-h). There are three answers you do not need.

TO THE MOON

In 1969, three people in a tiny spaceship made history with a trip the world will never forget. **1)_____** The first manned lunar landing mission was called Apollo 11 and their destination was the moon.

Tens of thousands of people worked on the Apollo project to send those men to the moon. The project, also known as Apollo program, took 10 years of preparation. The first manned Apollo flight was a disaster because the spacecraft caught fire on the ground. **2)_____** During future space missions, the astronauts practised flying their space crafts.

They also performed the tasks they needed to know so they were able to fly to the moon and land on it. On the Apollo 8 mission, the astronauts flew around the Moon ten times. They were almost ready for the first moon landing. The rocket that carried the spacecraft and the astronauts into orbit around the moon was called the Saturn 5. It blasted through space at a speed of at least 25,000 miles an hour. **3)____**The Apollo 11 mission used a special lunar module designed only for landing on the Moon.

It was called the "Eagle". On July 20, 1969, the Eagle landed on the Moon's surface. Only two astronauts actually stepped on the moon that day. Neil Armstrong became the first person to walk on the moon. **4)_____**The astronauts set up a TV camera, and the whole world watched the landing on TV.

Michael Collins waited for them in the spacecraft and orbited the moon. **5)___**. He had to make certain nothing happened to it!

A. **Russia also had missions but they used monkeys.**
B. **The three men were Michael Collins, Edwin "Buzz" Aldrin, and Neil Armstrong.**
C. **TV images were beamed back to earth and most people watched the event happen.**
D. **But NASA continued with the Apollo program after the fire.**
E. **Even at that speed, it took 3 days, 3 hours and 49 minutes to reach the moon.**
F. **It was his job to take care of the spacecraft that would take them all home.**
G. **The spacecraft was very fragile and had to be looked after.**
H. **Edwin "Buzz" Aldrin followed him about twenty minutes later.**
