

Trios

A trio is a set of three numbers that make addition and subtraction families.

9, 3 and 6 make a trio.

$$3 + 6 = 9$$

$$6 + 3 = 9$$

$$9 - 3 = 6$$

$$9 - 6 = 3$$

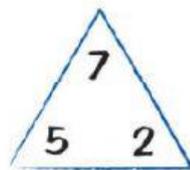

1 Complete the additions and subtractions for each of these trios.

a) $5 + 2 = \square$

$2 + 5 = \square$

$\square - 2 = 5$

$\square - 5 = 2$

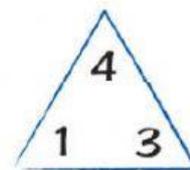

b) $1 + \square = 4$

$\square + 1 = 4$

$4 - 1 = \square$

$4 - \square = 1$

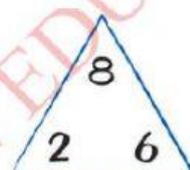

c) $\square + 2 = 8$

$2 + \square = 8$

$8 - \square = 2$

$8 - 2 = \square$

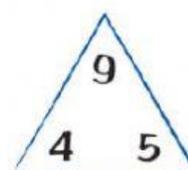

d) $\square + 5 = 9$

$\square + 4 = 9$

$9 - \square = 4$

$9 - \square = 5$

2 Complete these.

a) $8 + 1 = \square$

$1 + \square = 9$

$9 - 8 = \square$

$9 - \square = 8$

b) $\square + 2 = 6$

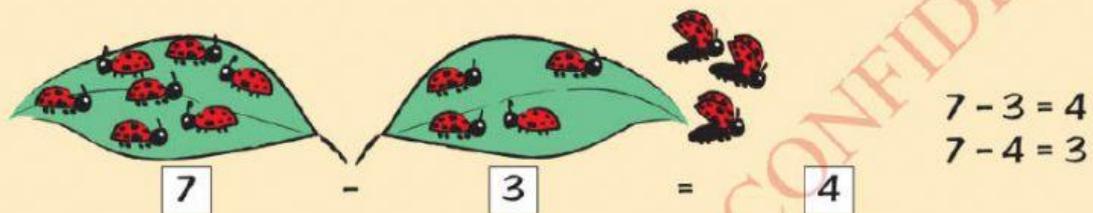

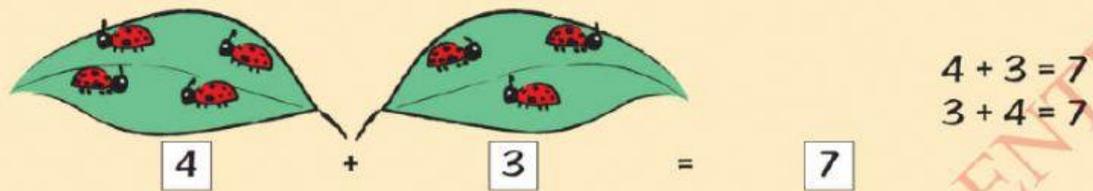

$\square + 4 = 6$

$\square - 2 = 4$

$6 - \square = 2$

Using addition

You can use addition to help you to learn subtraction facts.

1 Answer these.

a) $3 + 2 = \square$ $5 - 3 = \square$

b) $4 + 4 = \square$ $8 - 4 = \square$

c) $6 + 3 = \square$ $9 - 6 = \square$

d) $1 + 2 = \square$ $3 - 1 = \square$

e) $7 + 0 = \square$ $7 - 0 = \square$

f) $3 + 5 = \square$ $8 - 3 = \square$

3 Complete these for each trio.

a) **4** **7** **3**

$4 + \square = 7$

$7 - 4 = \square$

$3 + \square = 7$

$7 - 3 = \square$

b) **3** **5** **8**

$\square + 5 = 8$

$8 - \square = 5$

$5 + \square = 8$

$8 - 5 = \square$

c) **6** **7** **1**

$6 + 1 = \square$

$7 - \square = 1$

$1 + 6 = \square$

$7 - \square = 6$

63

2 Copy and complete these.

a)

$8 + 1 = \square$
 $9 - \square = 8$

$\square + 8 = 9$
 $9 - 8 = \square$

b)

$5 + \square = 10$
 $10 - 5 = \square$

$\square + \square = 10$
 $10 - \square = 5$

c)

$4 + 2 = \square$
 $\square - 4 = 2$

$\square + 4 = \square$
 $\square - 2 = \square$
