

As the Angle increases, the Name changes:

Parts of a **protractor**?

1 Place the cross or circle at the point (vertex) of the angle that you are measuring.

2 Read from the zero on the **outer** scale of your protractor.

3 Count the degree lines carefully.

- 4 If the angle that you are measuring turns in an anti-clockwise direction, you will need to use the **inner scale** of your protractor.

Workbook 6 – pg.162-163

Lesson 1: Measuring angles

- Estimate angles to the nearest degree and measure them using a protractor

You will need

- protractor
- ruler

Challenge
1

Read the scale and write the measurement.

a °

b °

1 Use a protractor to measure each angle.

2 Estimate the size of each angle, then measure IT.
