In 1996 Bell _____ an Internet computer store, through his website www.bell.com. Last year sales _____ more than \$10 million a day.

2. Read the following text and answer the questions.

THE CONVERSATION

The Ikea effect

How Ingvar Kamprad's company changed the way we shop

On January 27 2018, Ingvar Kamprad, who started Ikea as a teenager, died at the age of 91. Starting with stationery and stockings, he had built one of the world's biggest furniture companies. And the way he did it has revolutionised how retailers operate.

Progress Test Group IV

There are two features of modern life that we have Ikea to thank for: flat-pack furniture and a shop layout that gets you buying more of its products than you initially intended to. Both are principles that a number of other companies have copied. Ikea first brought out its flat-pack furniture in the 1950s. Whether you love or hate this concept, it was a stroke of genius and an effective way of making customers value the brand. There are the obvious aspects of cost and the practicality of shipping. But flat-pack furniture also has an important subconscious influence on consumers.

When Ikea stopped selling furniture that was already assembled, it was probably unaware of how this influenced its consumers. Scientists have since managed to identify exactly why consumers simply can't get enough of building their own furniture. The act of touching products while assembling the furniture can increase your perceived value of the product. In addition, the more effort a consumer has to put into building something the more they like it – a winning formula.

Tests have shown that the actual act of putting something together (so that it becomes a complete object) generates a much more positive perception of that object than purchasing it in a completed form. This is known as the Ikea effect. Furthermore, touch itself is associated with emotion. This means that when we touch something, the emotive part of our brain is activated and we experience a close connection with the product. Touch creates feelings of ownership and increases the perceived value of items. We feel proud of our achievement and experience feelings of being closely connected to the assembled item.

The layout of the Ikea stores has also paved the way for a more creative way of thinking about how to guide shoppers. If you have ever visited one of its huge warehouse stores, you may have gone in thinking you were only buying a few items, to find yourself coming out of the store with a trolley full of things. This is because of its circular design and one way system.

This design means you often can't see what is coming next and fear you'll miss something you need if you don't continue all the way along the path. There are potential escape points throughout the store, but that would mean that you will miss several sections. Consumers are rarely prepared to take that risk.

Because you know it may be tricky to go back for a particular item later on, you want to pick it up when you see it and put it in your big trolley. This ensures that the customer touches the product, which in turn again generates a psychological sense of ownership and decreases the chance that it will be put down before you get to the tills.

The fact that you can't see around the next corner also creates a sense of mystery. Environments perceived to be mysterious usually generate a stronger liking and so encourage shoppers to keep walking through the store. And the more you do this, the more likely you are to buy something – especially all the smaller items on display such

Progress Test Group IV

as candles, napkins and picture frames as they seem cheap compared to the larger more expensive items.

Ikea's creative ability to influence the subconscious of consumers is undoubtedly a big part of its success – and also why it's been copied by many other companies. Even though Ingvar Kamprad is no longer with us, Ikea has inherited from him a way of thinking outside of the box to communicate with consumers. It will be interesting to see what follows next.

1. How has Ikea revolutionised retail? How is different from other furniture stores?

2. What strategies does Ikea use to make shopping more interesting? Name at least 3:
 - 1)
 - 2)
 - 3)

3. Do you agree that Ikea has a certain charm to its brand? Why/why not?

3. Look at the paired sentences below. Match each one with situation a) or b).

1. Inflation has fallen by 1%.
Inflation fell by 1%
a) Two years ago it was 4%, last year it was 3%.
b) Last month it was 4%. This year it is 3%

A
B

2. I think I've lost the file.
Sorry, I lost the file.
a) I can't find the file. I wonder where I put it?
b) The file has gone and I'll never find it.

3. Has Jane called this morning?
Did Jane call this morning?
a) Jane promised to call this morning. It's 11 am.
b) Jane promised to call this morning. It's 2pm.

Progress Test Group IV

4. Sales improved.
Sales have improved.
a) Last year sales were poor. This year they are better.
b) Sales were poor initially, a year later they were better.

5. How long have you worked here?
When did you start working here?
a) In 1999.
b) Since 1999.

4. Complete the sentences by putting the verbs in brackets into either present simple, past simple or present perfect.

1. The company is doing very well. Last year sales went up (go up) by 15%, so far this year they have gone up (go up) another 12%.
2. We _____ (operate) all over Latin America. Recently we _____ (set up) branches in Peru and Ecuador.
3. This _____ (not look) like the right block. Are you sure we _____ (come) to the right address?
4. _____ (you/see) my laptop? I'm sure I _____ (leave) it here earlier.
5. I _____ (just/met) Andrew from Sales. _____ (you/know) him?
6. I _____ (never/speak) to him, but I _____ (speak) to his assistant on the phone yesterday.
7. I _____ (work) for WorldCom now – I _____ (be) there for more than five years.
8. I _____ (work) for WorldCom since last year, but now I _____ (want) to change jobs. _____ (you/hear) of any vacancies?

Progress Test Group IV

5. Choose the correct option in each dialogue:
