Hundreds of Islands

Vocabulary Words

Archipelago: a large group or chain of islands and cays.

Bluffs: A high land mass that is apart of the land, but juts into the sea.

Sounds: A sound is a narrow body of shallow water connecting a mainland and an island.

Salinas: a narrow body of deep water between a mainland and an island.

Creeks: a narrow body of water that run inland from the ocean.

Flats: an area of shallow, muddy water, usually around mangroves.

The Bahamas is an archipelago – a group of over 700 islands and cays lying close to one another. The islands stretch in a northwesterly to southeasterly direction.

Since the Bahamian islands cover such a large area, there may be different kinds of weather occurring in different parts of the country at the same time.

Weather forecasters divide the country into three groups of islands. They are Northwestern, Central and Southeastern Bahamas.

North -western	Central	South-eastern
Grand Bahama	Cat Island	Crooked Island
Abaco	Exuma	Acklins
Bimini	Long Island	Mayaguana
Andros	Long Island	Inagua
New Providence	Rum Cay	Ragged Island
Eleuthera		
Berry Islands		

LIVEWORKSHEETS

In The Bahamas there are seventeen inhabited islands. Ten of these are major islands. The major islands are those with most of the country's population. These islands also produce most of our products.

Each island has distinct features.
