

The Stomach

A. Directions: Label the parts of the stomach.

A. Directions: Match the following parts of the stomach to their functions.

cardia

It connects the stomach to the esophagus.

fundus

It is the central part which produces certain acids that help to digest the food and kill the germs in the food.

antrum

It is the upper part of the stomach where the food is deposited.

body

It is the part where the stomach mixes with gastric juices, or chemicals that digest the food.
