

PLANET EARTH

1. VOCABULARY.

Drag and drop the correct word under the picture.

Earth	forest	animals	plants	tree	ocean
sun	paper	rubbish	the Arctic	farm	factory
					
	Earth				
					

2. FILL IT IN.

Watch the story and complete the sentences with the missing words.

- Forests are home to over half of the world's animals and plants.
- Plants clean the air and produce oxygen for us to breathe.
- The oceans are home to millions of marine animals.
- They absorb the sun's heat and transfer it to the atmosphere.
- At opposite ends of the world, the Arctic and Antarctic are freezing cold lands.
- It is so cold that the sea is covered in ice.
- Rivers collect rain water and carry it to the oceans.
- Along the way, plants absorb and clean the water so it is safe for us to drink.

PLANET EARTH

3. LET'S ORDER.

Watch the story order the sentences according to the video.

- | | |
|--|--|
| | Second they go to the ocean, home to millions of marine animals. |
| | Finally they see a green world where people respect the nature. |
| | The kids go to the planet earth museum. |
| | After that they go to the river zone. The rivers collect the rain water. |
| | First they visit the forest, home of animals and plants. |
| | Then they visit the Antarctic where the sea is covered in ice. |

4. WHAT'S THE PROBLEM?

Match the place with its corresponding problem.

Forest

The fuel we use for energy makes the climate warmer and the ice melts.

Ocean

Farms and factories pollute this place with pesticides and chemicals.

Antarctic

We destroy more than 36 football fields of forest every minute.

River

A lot of rubbish we produce on land pollutes this place. The animals eat the plastic and die.
