membuka kesedaran	
haiwan yang diabaikan	

ANIMAL ABUSE ON THE RISE – STOP IT!!!

Animal abuse is a nationwide problem. It is also known as animal cruelty, animal violence or animal maltreatment. Abuse means to cause pain, suffering and even death. In Malaysia, there are a lot of cases in big cities like Kuala Lumpur, Penang and Johor. There are some examples of how animals are abused. They are beaten, starved and used for scientific research. Some of them are even poisoned to death. Millions of helpless pets like dogs, cats, dan birds die each year.

Many organisations like Paws Animal Welfare Society (PAWS), Society for the Prevention of Cruelty to Animals (SPCA), and Second Chance Animal Society (SCAS) have worked together to prevent and stop cruelty on animals.

Here are some tips to prevent animal abuse:

- Read books and magazines to create awareness on animal abuse
- Report any animal abuse to the authorities
- Watch documentaries, videos or movies about animals
- Take care of their habitats
- Take part in events to protect animals
- Visit an animal shelter to do charity work
- Donate to animal organisations
- Adopt abandoned animals as pets

animal maltreatment	even death
even poisoned	worked together
abandoned animals	create awareness
documentaries	authorities
nationwide problem	scientific research
prevent animal abuse	cruelty on animals

MATCH THE QUESTIONS FROM A TO THE ANSWERS IN B

	A : Questions
1.	List three **effects** that animal abuse can cause on animals.
