Science Home Activity No. 8 Term-1

Activity: Liveworksheet

Grade - 5

Students should read thoroughly from the Science Textbook on pages 36 & 37.
Then solve the activity with the help of a science textbook.

Direction I: Match the good crops in Column A with their appropriate images in Column B. Write the letter of the correct answer.

Column A

_____ 1. The soil should be suited to the kind of crop grown, and should be well prepared for **ploughing**.

_____ 2. The application of **insecticides and Pesticides** should be sprayed to get rid of insects and pest.

_____ 3. Crops should be **irrigated** at the right time.

_____ 4. Unwanted plants (**weeds**) compete with the crops for nutrients and thus should be removed.

_____ 5. Fields should be properly **fenced**.

Column B

Direction II. Fill in the blank with the correct answer to complete the statements.

1. _____ and fertilisers should be added to the soil to make it _____.
2. Good quality of _____ should be _____.
3. _____ such as cows and _____ should not be properly fence.
4. The harvested crops should be protected from moisture, pests and small animals such as _____ and _____.
5. Moisture can spoil the harvested crops by allowing growth of _____ and _____.

Direction III. Write True if the statement is correct and write False if it is wrong.

- _____ 1. Fertiliser should be sprayed to get rid of insects and pets.
- _____ 2. Herbivores such as buffaloes should be allowed to enter the fields to feed to survive.
- _____ 3. Harvested seeds should be stored dry place to not allowing bacteria and fungi to grow.
- _____ 4. Weeds don't compete with the crops but they share nutrients from the soil.
- _____ 5. Manure from animals should be added to the soil to become fertile.
