

# UNIT 1: INTERACTION

## SOME VOCABULARY

Bones

Brain

Eyes

Neurons

Skin

Muscles

Skeleton

Taste Buds

Joints

Spinal Cord

Nerves

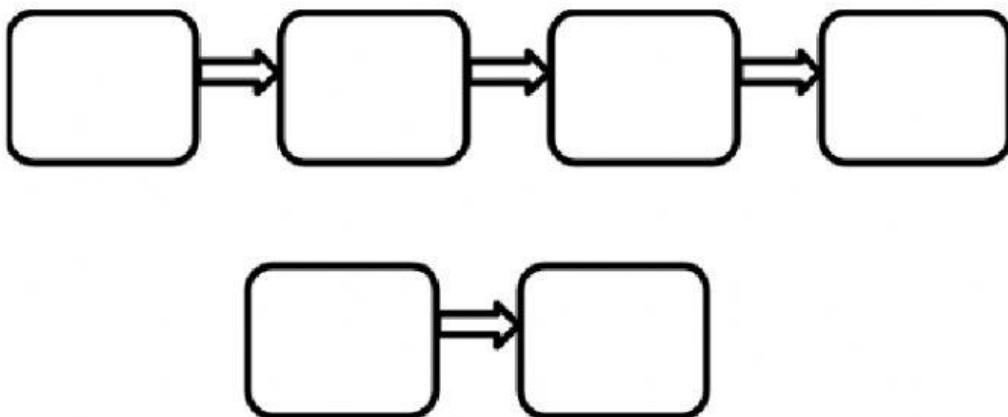

Nostrils

Tongue

## THE NERVOUS SYSTEM

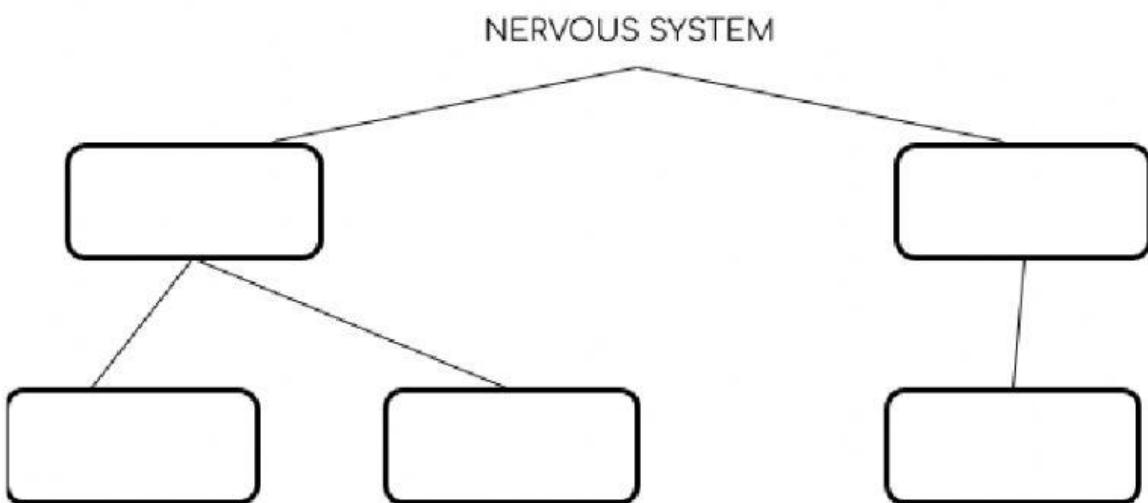

### ¿CÓMO SE FORMAN LOS CUERPOS DE SISTEMAS? - HOW ARE SYSTEMS BODIES FORMED?

\_\_\_\_\_ are made up of \_\_\_\_\_, \_\_\_\_\_ that make the same function create \_\_\_\_\_. \_\_\_\_\_ group together to form \_\_\_\_\_, \_\_\_\_\_ that work together form the \_\_\_\_\_ which make up the bodies of organisms.

### ¿QUÉ HACE EL SISTEMA NERVIOSO? - WHAT DOES THE NERVOUS SYSTEM DO?

The nervous system sends \_\_\_\_\_ from the \_\_\_\_\_ to different parts of the body, with this action we \_\_\_\_\_ to the stimuli from our \_\_\_\_\_. It also controls our \_\_\_\_\_ systems ( \_\_\_\_\_ or \_\_\_\_\_ systems)

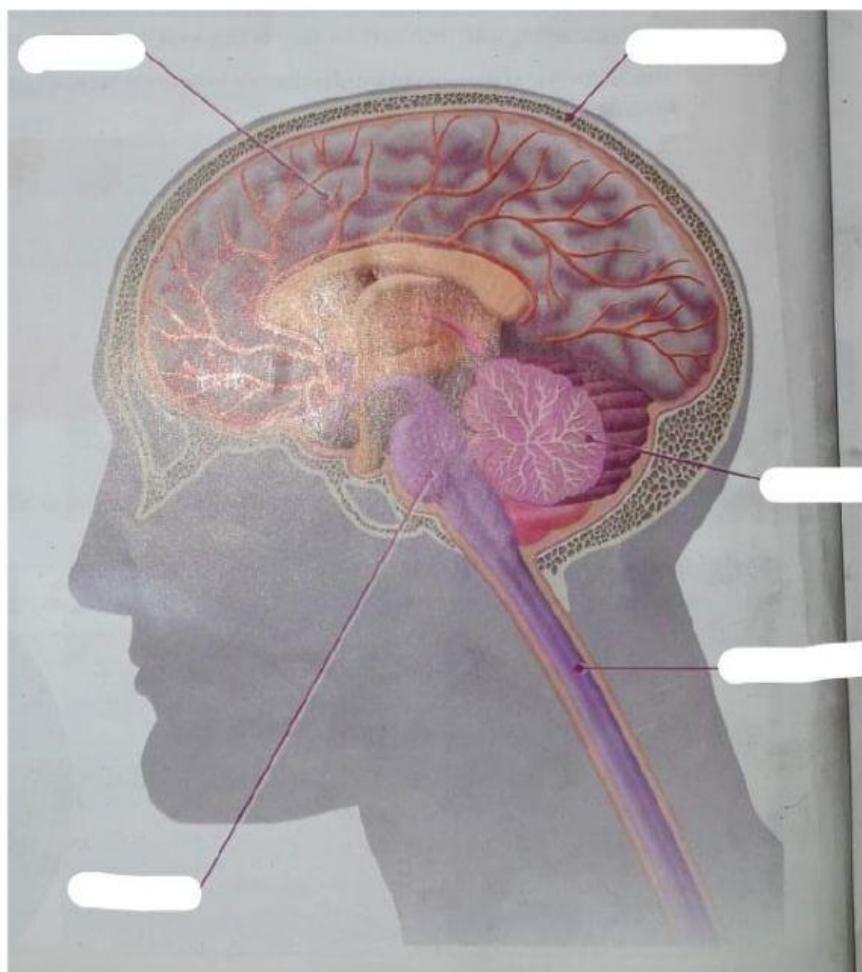

## THE CENTRAL NERVOUS SYSTEM

**The brain** : controls our nervous system. It is protected by the \_\_\_\_\_ (or cranium). Parts:

- 1- The \_\_\_\_\_ is the biggest part. This is where we process the information from our \_\_\_\_\_. We use it to take \_\_\_\_\_, to \_\_\_\_\_ or to \_\_\_\_\_
- 2- The cerebellum is controlling our \_\_\_\_\_, \_\_\_\_\_ and \_\_\_\_\_.
- 3- The \_\_\_\_\_ is the continuation of the \_\_\_\_\_. It controls \_\_\_\_\_ actions (sleep)

**The spinal cord** : is made up of \_\_\_\_\_. It controls our \_\_\_\_\_ actions.

## THE PERIPHERAL NERVOUS SYSTEM

Nerves: are made up of tiny \_\_\_\_\_ called \_\_\_\_\_ that transfer information using \_\_\_\_\_ and \_\_\_\_\_ signals.

Different neurons do different tasks:

1-Sensory neurons collect information from our \_\_\_\_\_ organs (eyes, ears, nose, tongue, skin).

2-The \_\_\_\_\_ interprets the information and sends signals to the rest of the body.

3-Motor neurons send messages from the \_\_\_\_\_ to our \_\_\_\_\_ system.
