Animal Behaviours

All young animals can survive on their own.

Some animal parents care for their offspring to help them survive.

Polar bears **feed** their offspring. They show their cubs how to find food.

The lioness protects her offspring. She is **carrying** her cub.

The chimpanzee **protects** their offspring from danger and other animals.

LIVEWORKSHEETS

How are these animals helping their offspring? Choose the correct answer.

1. 

2. 

3.
