Hydrometeorological Hazards

These are meteorological (atmospheric and hydrospheric) and climate events. These naturally occurring events have a negative effect on the environment, animals, and humans.

an intense circular storm that originates over warm tropical oceans and is characterized by low atmospheric pressure

a storm with thunder and lightning and typically also heavy rain or hail.

violently rotating columns of air in contact with the earth and a cloud

the landward movement of seawater caused by a strong weather disturbance offshore.

heavy rains that accompany the seasonal wind of Southeast Asia

a temporary overflow of water onto land that is normally dry.
