## Essay Tip

---

A good way to make your writing more academic and stylish is to use some noun phrases in your essay. Noun phrases give the reader more information about a noun. For example, with the nouns *prices* or *the Internet*, you can make the noun phrases *rising house prices* or *the invention of the Internet*.

You should spend about 40 minutes on this task.

Write about the following topic:

***Some people think that there are things individuals can do to help prevent global climate change. Others believe that action by individuals is useless and irrelevant and that it is only governments and large businesses which can make a difference.***

Discuss both these views and give your own opinion.

Write at least 250 words.
