To: Walter Davis <wdavis@sheenmining.com>  
 From: Charles Allen <callen@sheenmining.com>  
 Sent: January 29, 2008  
 Subject: Figures from Santa Rosa

Hi Walter,

I'm sure you're going to be more than pleased with these first official figures from our Santa Rosa mine in South America. The output is exceeding our predictions.

	Northern Mines (4th quarter)	Santa Rosa (4th quarter)
Gold (oz)	6,600	7,300
Silver (oz)	3,200	5,900
Copper (tonnes)	1,800	1,500
Zinc (tonnes)	3,300	4,100

Output is far above the projected amounts made before we purchased the Santa Rosa mine in Honduras. What's more is that gold, silver, and zinc from Santa Rosa have topped the quarterly average of our domestic Northern Mines.

We know that we posted strong 4th quarter earnings. Tomorrow Lucy Smith will present a comprehensive report outlining the impact Santa Rosa had on Sheen Mining's overall revenues for 2007. We expect everyone to be in attendance.

If there's anything you'd like to discuss before tomorrow's meeting, give me a call.

Charles

165. What is the main issue discussed in this email?
- (A) A company's quarterly income
  - (B) Money saved on mining abroad
  - (C) The results of an annual fiscal report
  - (D) The performance of a recent acquisition
166. What is surprising about the news?
- (A) The company had been optimistic about the 4th quarter.
  - (B) The foreign mine yielded more than expected.
  - (C) The original production estimate was accurate.
  - (D) The domestic mine recorded its highest output ever.
167. What metal is more abundant in the domestic mine?
- (A) Gold
  - (B) Silver
  - (C) Copper
  - (D) Zinc
168. Who will give a presentation on the company's fiscal situation?
- (A) Santa Rosa
  - (B) Lucy Smith
  - (C) Walter Davis
  - (D) Charles Allen

Questions 169-172 refer to the following article.

**Farmers Feel FTA Woes**

*Business This Week* for April 16

By Gerard Sears

Governments in Europe and the Americas have put an end to a decades-long trade dispute by signing the cross-Atlantic Free Trade Agreement. Free-market advocates are celebrating the agreement scheduled to go into effect June 1, while at home at least one group remains apprehensive.

Farmers will see agricultural subsidies cut by 5% by the end of this year - the first step in a five-stage process. By 2017, all 15 participating nations are required to limit subsidies to farmers to 10% of their earnings. In unstable industries such as wheat and barley, farmers can be subsidized by up to 50%.

John Clement, a corn farmer in Iowa, says the new pact will bankrupt his family-run farm. "We won't be able to compete with the cheaper imports," he says. "We'll have to sell our land and our way of life."

The Federal Minister of Agriculture and Trade, Barry Holmes, says that the government is implementing the cutbacks in phases to give farmers enough time to adjust.

"We have programs to help farmers who want to rethink their business," Holmes said at a press conference on Friday.

Mr. Holmes is referring to classes that start next month at community colleges around the country. Mr. Holmes says the classes are available free of charge and are geared specifically for those who are forced to change their career in the new era of free trade.

169. What is the main topic of this article?

- (A) The classes of community colleges
- (B) The effects of a trade pact on an industry
- (C) The creation of an international union
- (D) The participants of an import-export agreement

170. How many countries are involved?

- (A) 5
- (B) 10
- (C) 15
- (D) 50

171. Why are farmers dissatisfied?

- (A) They'll be forced to cut their farm production.
- (B) They'll have to pay back old loans immediately.
- (C) They'll have to pay their workers higher wages.
- (D) They'll receive less money from the government.

172. What kind of program is the government offering?

- (A) Occupational training courses
- (B) Lectures on financial management
- (C) Classes on modern farming techniques
- (D) Ways to compete on an international level
