

What was the date ?

A Q U I Z Z is a competition with questions. If you answer the questions correctly, you can win a P R I Z E.

Jody is doing a quizz and she needs the internet to find information about the Quizz questions but she has a problem because the internet isn' t working. She needs Kiran to help her. The first question is : who was the first man on the moon. Luckily, Kiran knows the answer. Neil Armstrong was the first man and Buzz Aldrin was the second. They were both American astronauts . It was on July 20th, 1969. Kiran remembers all this information because there was a TV programme about it and also because his mother was born on exactly the same day.

The next question is about the name of the spaceship. Kiran also knows the answer. It was Apollo 11.

The prize is a camera. Kiran makes a joke about it and says it is his prize because he answers all the questions. Jodie says that he can borrow it from her but that the prize is hers.

Drag the answers to the right questions.

1) What is the prize if you win the Quizz ?

Apollo 11

2) When was Kiran' s mother born ?

It isn' t working

Neil Armstrong

3) What is the second question ?

A camera

July 20th 1969
