**Question 1:**

By referring to the electronic configuration of each element below:

(a) State the period, group and block for each element.

Elements	Period	Block	Valence electron	Group	Ion
<b>A</b>					<b>A</b>
<b>B</b>					<b>B</b>
<b>C</b>					<b>C</b>
<b>D</b>					<b>D</b>
<b>E</b>					<b>E</b>

(b) State how the elements **A** to **E** are arranged in the periodic table?

**The elements are arranged in the order of**

---

- (c) Why are elements **C** and **D** in the same group?  
**Both elements C and D have the same number of**  
\_\_\_\_\_.
- (d) Why are elements **A** and **C** in the same period?  
**Both elements A and C have the same**  
\_\_\_\_\_.
- (e) Between C and D, which is one of the elements is more electronegative?  
\_\_\_\_\_.
-   
Remember!
- size of atom  $\propto \frac{1}{\text{electronegativity}}$*
- (f) Between A and C, which is one of the elements is more electronegative?  
\_\_\_\_\_.
- (g) Between C and D, which one of the elements has higher first ionization energy?  
\_\_\_\_\_.
-   
Remember!
- size of atom  $\propto \frac{1}{IE_1}$*
- (h) Between A and C, which elements has higher first ionization energy (IE<sub>1</sub>)?  
\_\_\_\_\_.
