OUR BODY

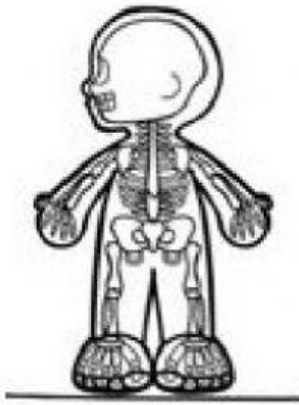

The human body
is made up
of multiple
interacting systems.

MUSCULAR SYSTEM

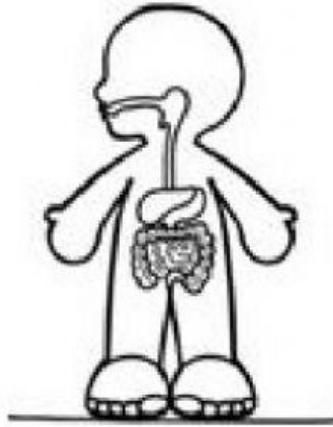

The muscular system allows
the body to move.

SKELETON

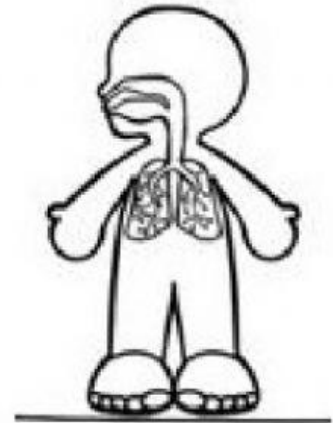

The skeleton is made up of bones and supports the body.

DIGESTIVE SYSTEM

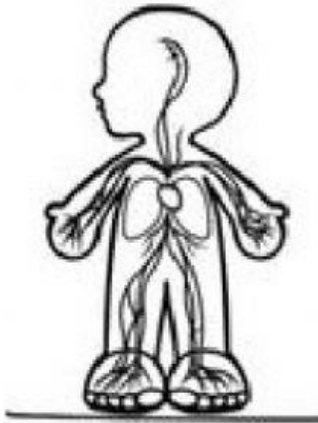

The digestive system breaks down food into nutrients.

RESPIRATORY SYSTEM

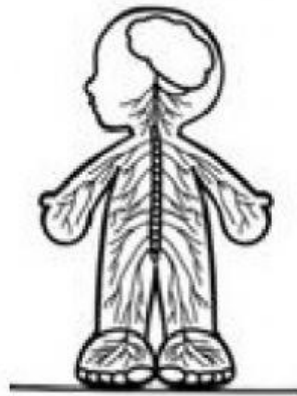

The respiratory system helps us to breathe in oxygen and breathe out carbon dioxide.

CIRCULATORY SYSTEM

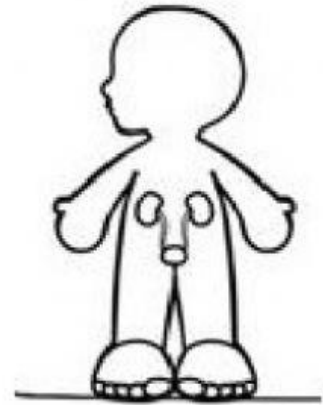

The circulatory system pumps
blood through our body.

NERVOUS SYSTEM

The nervous system controls
everything you do,
including breathing,
walking, thinking and feeling.

EXCRETORY SYSTEM

The excretory system expels
waste substances
from our body.
