

Name _____ Date _____

Mathematics – Rounding to the nearest Tens and Hundreds

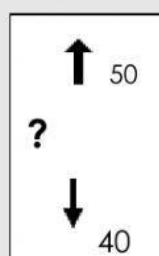

Rounding Rule

If the spot before is 5 or more, round up [↑]!

Examples: $7\textcolor{blue}{6} = 80$

$3\textcolor{blue}{4}3 = 340$

Round to the nearest ten. [Remember to use the rounding rule.]

1. $19 = \underline{\hspace{2cm}}$

2. $52 = \underline{\hspace{2cm}}$

3. $208 = \underline{\hspace{2cm}}$

4. $167 = \underline{\hspace{2cm}}$

5. $38 = \underline{\hspace{2cm}}$

6. $145 = \underline{\hspace{2cm}}$

7. Which of these numbers will round to 50?

48	51	55	61	44	52	59	42	53
----	----	----	----	----	----	----	----	----

Say whether each of these statements is **true** or **false**.

8. 426 rounds to 420 _____ 9. 455 rounds to 460 _____

Round to the nearest hundred [Remember to use the rounding rule.]

10. $167 = \underline{\hspace{2cm}}$

11. $288 = \underline{\hspace{2cm}}$

12. $645 = \underline{\hspace{2cm}}$

13. $464 = \underline{\hspace{2cm}}$

14. $85 = \underline{\hspace{2cm}}$

15. $919 = \underline{\hspace{2cm}}$

Say whether each of these statements is **true** or **false**.

13. 426 rounds to 500 _____ 14. 725 rounds to 700 _____
