

Habitats of Living Things

Complete the table below using the following pieces of information.

1. Go on short **nature walk** in your yard. Identify **three (3) different habitats** in your yard. List them in the table.

These habitats could be in trees, on leaves, in soil, under trees, in holes, in your flower garden or water.

2. For each habitat found, list the living things you found living there.

3. Explain why the particular habitat was beneficial to the living things.

Type of habitat	Living things found	How does the habitat benefit the living things?
