## SOCIAL SCIENCE

## UNIT 1: WHICH WAY IS NORTH?

Teacher Laura

1. Read and complete:

A \_\_\_\_\_ is a representation of an area on a \_\_\_\_\_ surface. Maps help us locate different places. Different types of maps show different information

WHAT TYPE OF MAP SHOWS THE HIGHEST PARTS OF THE EARTH?

a \_\_\_\_\_ is a model of the Earth

What is a political border?

Which countries share a political border with Spain??

\_\_\_\_\_ maps show natural features of the Earth, such as oceans, seas, rivers, lakes, mountains and mountains ranges

\_\_\_\_\_ maps have \_\_\_\_\_ for places of interest, such as a city or town hall, museums, parks and stations

Look at this physical map. What do the different colours represent?

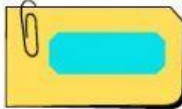

On which type of map would you find the longest river in the world?

Different types of maps:

Teacher Laura

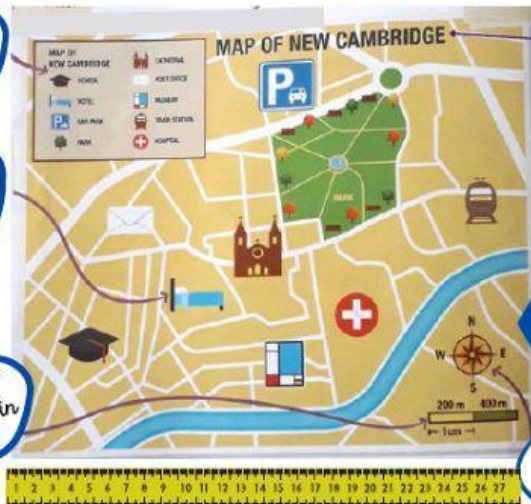

To be able to read maps, we need to know about the different things on them.  
Look at the [ ] on the map below.

WHICH FLOWER DO WE USE ON MAPS?

The [ ] tell us what each symbol represents

[ ] represent natural and man-made features, such as rivers and museums

The [ ] shows how long distances on a map are in real life

The [ ] tells us the place that is being represented

Why do you think it is called a compass rose?

The [ ] shows north, south, east and west

Find a street map of your local area, choose a location and give directions. To **give directions** means to tell someone how to get to a specific place

WHICH MAP SHOULD YOU USE IF YOU ARE LOST IN A CITY?
