

Practice 3 Bar Graphs

1. The bar graph shows the mass (rounded off to the nearest 10 kg) of old newspapers a class collected each week for five weeks. Study the graph and answer the questions that follow.

- (a) What was the mass of newspapers collected by the class in the second week? _____ kg
- (b) In which week did the class collect the greatest mass of newspapers?
The _____ week
- (c) What was the total mass of newspapers collected by the class in the third and fourth weeks? _____ kg
- (d) What was the mass of newspapers collected by the class in the
- fourth week? _____ kg
 - fifth week? _____ kg

What was the increase in the mass of newspapers collected between these two weeks? _____ kg
