

## SCIENCE CLASSWORK 1

### SECOND TERM

**TOPIC: TEMPERATURE**

**Ms. GABRIELA CHENCHE**

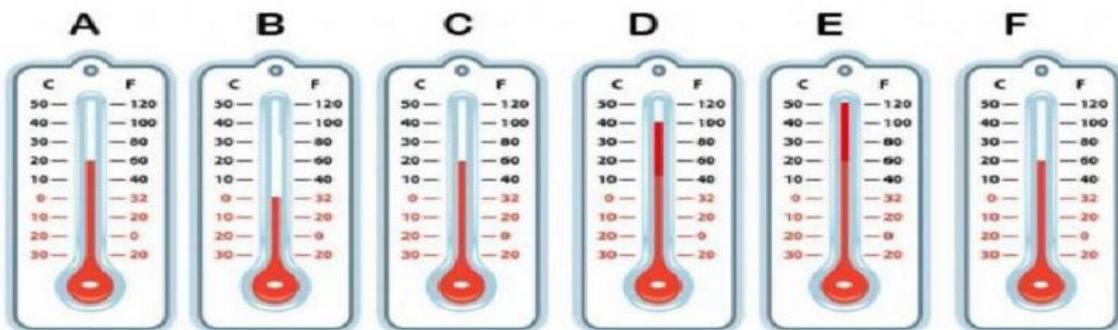

**NAME:**

**1<sup>ST</sup> BCC.**

#### 1. Match with lines the statements below

- |                                      |  |
|--------------------------------------|--|
| *Temperature is a measure            | *device that measures temperature        |
| *Absolute zero is the temperature    | *of the average of kinetic energy        |
| *The kinetic theory of matter states | *at which particles stop moving          |
| *A thermometer is a                  | *that particles are constantly in motion |

#### 2. Use the thermometers below to answer the questions

1. Which thermometer has the coldest temperature? \_\_\_\_\_

2. Which thermometer has the hottest temperature? \_\_\_\_\_

#### 3. Drag and drop

**SLIDING**

**MOTION**

**FREE**

**FAR**

The kinetic theory of matter explains the \_\_\_\_\_ of particles in the 3 states.

Particles in a solid are not \_\_\_\_\_ to move around.

Particles in a liquid state are constantly \_\_\_\_\_.

Particles in a gas state are \_\_\_\_\_ apart and move at high speed.
