

Unit 5: Let's Experiment

Match the words with the correct meanings @ explanations.

DNA

clone

Genetically Modified Crops

cure

disease

vaccine

spacecraft

planet

satellite

Wind turbine

Solar panel

Battery

1

Deoxyribonucleic acid = The chemical at the center of the cells of living things that controls the structure and purpose of each cell and carries genetic information during reproduction).

7

A special substance that you take into your body to prevent a disease, and that often contains a weakened or dead form of the disease-causing organism.

2

A plant or animal that has the same genes as the original from which it was produced.

8

a vehicle used for travel in space.
