

SCIENCE 5

ASEXUAL REPRODUCTION IN PLANTS

Match the method of asexual reproduction with its meaning.

Binary fission	A. an organism can grow a limb that got detached
Budding	B. a parent animal divides itself into two
Regeneration	C. an outgrowth of the parent organism develops into another organism
Fragmentation	D. a new organism grows from each detached part of the parent animal

Group the animals according to their method of asexual reproduction.
Write A for Binary fission, B for budding and C for Regeneration.

Starfish

Hydra

Sea anemone

amoeba

paramecium

earthworm
