Classify each exponential function to Growth or Decay:

1) $y = 2. \left(\frac{4}{5}\right)^x$ is exponential function.

2) $y = 0.5. (5)^x$ is exponential function.

Match each function with its graph:

1) $y = -\left(\frac{1}{5}\right)^x$

2) $y = 6^x + 3$

3) $y = 3. \left(\frac{1}{4}\right)^x$
