LIVEWORKSHEETS

Sunshine

29–32. Read the following passage carefully, then write True (T) or False (F) for each statement. (1 pt)

Would you like a robot in your house? It is now generally accepted that in the future, robots will take over many of our tasks, especially jobs of a repetitive nature. But it is doubtful if robots will ever be able to do any of the more creative types of work – or indeed if people would want them to do. In the home, robots would probably be used to do the cleaning, table-laying, scrubbing and washing up, but it is considered unlikely so far that they will be used to do the cooking – at least not in the near future. Robots in the home might not be creative enough to do the cooking, plan the meals, and so on. They would be used as slaves, freeing people to do more of the things they want.

29. It is thought that robots will be able to do the same jobs every day. _____
30. It is certain that robots will be able to help us with creative tasks. _____
31. In the near future, robots will be used to do such things such as cooking. _____
32. Robots will help us carry out some of the housework such as washing dishes. _____
