

# We are the Planets

We can see the whole                      System from here.

I think we can hear it from here too.

We are the                      of the Solar System

Different                      for every one

The                      never ends

We are such good

And we all                      the sun

## SUN

Around me, so hot, I'm roasting, ya see?

I'm the center of the solar system, planets be spinning

Now I pass the mic to the planet closest to me

Here comes the Sun rapping first on this track, from the beginning

## MERCURY

Cold, moon, slow, smallest, super

Mercury! The                      planet, small as Earth's                      (MOON: "Yo!")  
I get                      hot and                      and I spin very

## VENUS

I'm Venus! I've got lakes and rivers that spray

I'm different size as Earth but spin the same way

## EARTH

Yeah, I'm Earth, I'm the \_\_\_\_\_ to every boy and girl  
(Sung by Stars) Such a beautiful, beautiful

## MARS

|                  |                                       |         |
|------------------|---------------------------------------|---------|
| I'm Mars, the    | planet, I've got                      | and ice |
| And I've got two | - nice - that's like one moon, twice! |         |

## JUPITER

I'm Jupiter! the biggest planet, I'm humungous, gargantuan  
I spin the fastest, rap the fastest, plus I'm \_\_\_\_\_, BAM SON!

## SATURN

## URANUS

## NEPTUNE

I'm Neptune, I'm cold, dark, windy and mysterious  
I'm Uranus, I say that with pride, okay, I lied  
I'm very stormy, so bring an umbrella - I'm serious  
Made up of billions of rocks, dust, and other things  
I'm embarrassed 'cause I'm the only planet lying on its side  
Oh please, I'm Saturn, check out my beautiful rings

ALL PLANETS ()  
We're the                      in the Solar  
                                 sizes for every one  
The music                      ends  
We are such                      friends  
And we all orbit the

Well, we are done exploring the Solar System.  
I am thirsty. Let's explore the rest of the Milky Way Galaxy.
