

< Looking at Earth >

1. In the Solar System, there are...
 - ◆ four planets made of rock. Earth is one of them.
 - ◆ eight planets made of rock. Earth is one of them.
 - ◆ four planets made of gas. Earth is one of them.
2. What are latitude and longitude?
 - ◆ They are parallels. We use them to identify our location.
 - ◆ They are meridians. We use them to identify our location.
 - ◆ They are imaginary lines. We use them to identify our location.
3. What are the two types of movements of the Earth?
 - ◆ Revolution and the orbit movement.
 - ◆ Rotation and revolution.
 - ◆ Rotation and circular movement.
4. When the North Pole tilts towards the Sun...
 - ◆ it is night.
 - ◆ it is summer in the Northern Hemisphere.
 - ◆ it is summer in the Southern Hemisphere.
5. When did Neil Armstrong and Buzz Aldrin land on the Moon?
 - ◆ They landed on the Moon in 1959.
 - ◆ They landed on the Moon in 1961.
 - ◆ They landed on the Moon in 1969.
6. Day and night are caused by...
 - ◆ the tilt of the Earth's axis.
 - ◆ Earth's revolution around the Sun.
 - ◆ Earth's rotation on its axis.
7. Earth's rotation takes about...
 - ◆ 365 days.
 - ◆ 24 hours.
 - ◆ 1 month.

8. One complete revolution of Earth around the Sun takes about...

- ♦ one season.
- ♦ one day.
- ♦ one year.

9. There are four seasons because...

- ♦ Earth rotates on its axis.
- ♦ the temperature of the Sun changes.
- ♦ Earth's axis is tilted as it moves around the Sun.

10. When did the first astronauts move into the International Space Station (ISS)?

- ♦ 2000.
- ♦ 1961.
- ♦ 1963.

11. When did the first rocket reach space?

- ♦ 1959.
- ♦ 1969.
- ♦ 1942.

12. Which tool is used to see the Universe?

- ♦ Globe.
- ♦ Telescope.
- ♦ Map.

13. Which is the point on Earth that is furthest north?

- ♦ Equator.
- ♦ North Pole.
- ♦ South Pole.

14. What does latitude tell us?

- ♦ How far we are from the Equator.
- ♦ How far we are from the Prime Meridian.
- ♦ How far we are from the North Pole.

15. Lines of latitude are called...

- ◆ parallels.
- ◆ meridians.
- ◆ degrees.

16. What does longitude tell us?

- ◆ How far we are from the Equator.
- ◆ How far we are from the Prime Meridian.
- ◆ How far we are from the North Pole.

17. Lines of longitude are called...

- ◆ parallels.
- ◆ meridians.
- ◆ degrees.

18. The Equator divides the Earth into...

- ◆ Eastern Hemisphere and Western Hemisphere.
- ◆ Northern Hemisphere and Southern Hemisphere.
- ◆ North Pole and South Pole.

19. Which lines are measured in degrees from 0° to 180° with the letters E or W?

- ◆ Parallels.
- ◆ Meridians.

20. Which lines meet at the North and South Poles?

- ◆ Parallels.
- ◆ Meridians.
