

Use the models to compare. Then write a multiplication sentence. **See Example 1**

9. 3 times as many

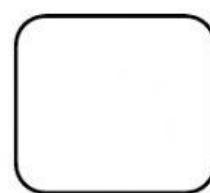

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

10. 5 times as many

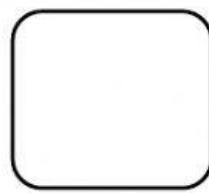

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

11. 4 times as much

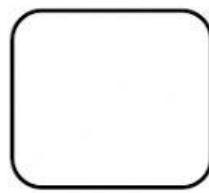

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

12. 10 times as much

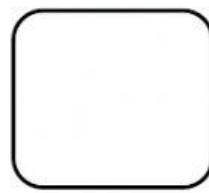

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

13. 2 times as many

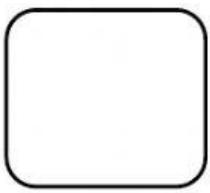

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

14. twice as many

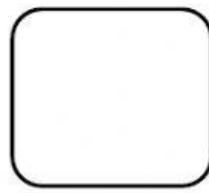

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

15. 8 times as many

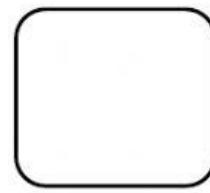

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

16. 4 times as many

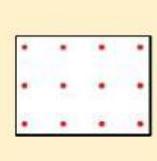

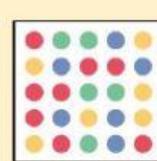

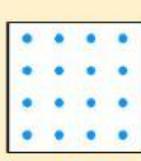

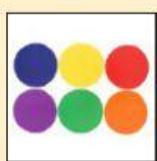

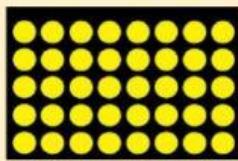

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

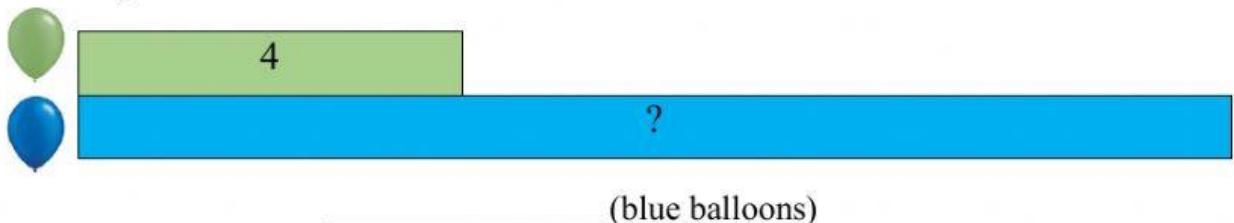

17. 5 times as much

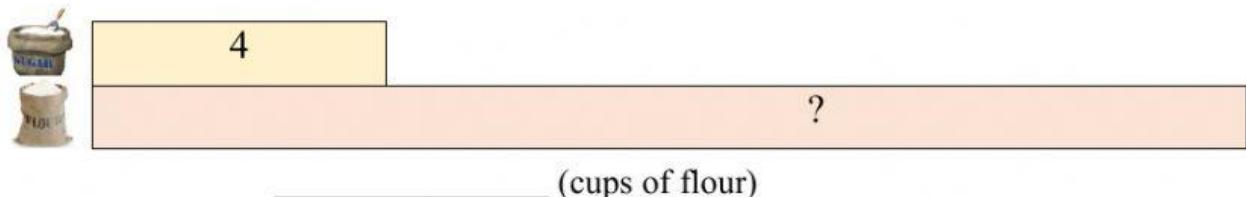

$$\underline{\quad} \times \underline{\quad} = \underline{\quad}$$

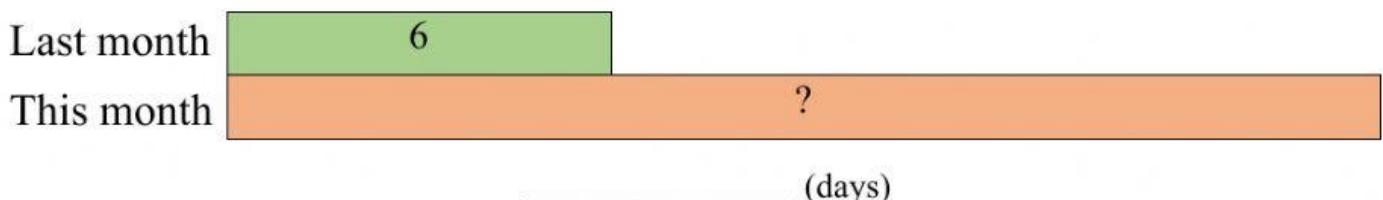

There are 3 times as many blue balloons as green balloons.  
How many blue balloons are there?

She needs 4 cups of sugar.  
Nan needs 4 times as much flour as sugar.  
How much flour does she need?

Devi practiced her flute 6 days last month.  
How many days did she practice this month if she practiced 3 times as many days?

Perry paid 10¢ for a rubber snake. Sam paid 2 times as much for his snake. How much did Sam pay for his snake?
