

Comparing Bar Graphs Practice

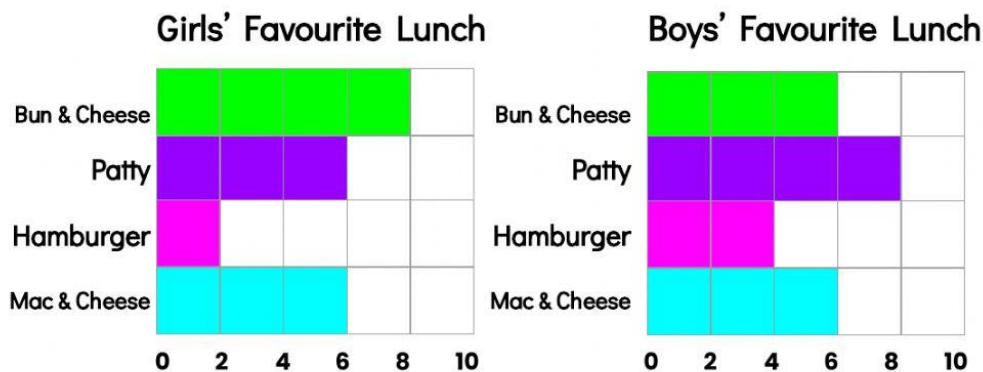

1. Count by 2s.

2				10				18	
	24				32		36		40

2. Drag and drop to tell if the keywords give us clues to add or subtract.

ADD +	SUBTRACT -	KEY WORDS	
		in all	both
		how many <i>more</i>	less than
		altogether	how many <i>left</i>

3. Miss Smith took a survey of Grade 2's favourite lunches. Use the bar graphs to answer the questions.

- What are the bar graphs about?
- Each square = how many students?
- How many girls liked hamburgers altogether?
- How many more girls like bun & cheese than boys?

more girls
- How many students love patties *altogether*?

students love patties altogether.
- What is the least favourite lunch?
- Who loved bun & cheese the most?
How many?
- Who loved patties the most?
How many?
- What lunch did the girls and boys like the same?

- j. How many students does Miss Smith have in all? $+$ girls
boys
students
