

SUMA POR COMPENSACIÓN: SUMA Y RESTA EL MISMO NÚMERO PARA QUE EL PRIMER SUMANDO SEA UNA DECENA

Estrategia

$$56 + 27 = 60 + 23 = 83$$

Diagram illustrating the compensation strategy for addition. A bracket above the equation shows $+4$ being added to 56 to reach 60. A bracket below the equation shows -4 being subtracted from 27 to reach 23. The final result is 83.
