Project planning

Activity 4 *interactive*

Stages	Description
Programming	This is usually a description of the requirements. Your program must meet the basic requirements to be successful.
Testing	Here, you will think about what you did. This will help you improve in the future.
Self-reflection	This is about deciding what you need to do and when you need to do it. You will also decompose the problem and create a pseudocode algorithm for the program.
Project brief	Here, you will create the program using text-based programming software.
Planning	You do this part to check that the BMI calculator program meets the basic requirements.
