

Tommy, 11 years old

Coin Operated

Spaceship

I enjoyed this short film very much. The boy was determined and he worked very hard to achieve his goal. I was really surprised with the ending.

Ken wants to be an astronaut and travel to the space. He always dresses like an astronaut. When he was a boy, he saw a coin-operated spaceship kiddie ride. He was excited. He thought it could bring him to the Moon. However, it failed. He was upset and disappointed and he had an idea. He works very hard to earn lots of money, so that he can have enough coins to make the spaceship kiddie ride fly to the Moon. Will his dream come true?
