

Name:

Class:

Subject:

Match the elements and properties correctly

1. Carbon

0

Is a soft, light, silvery, white reactive element, which never exists as a pure element in nature

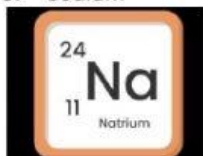

2. Oxygen

0

Gas is 2.5 times as heavy as air, has a suffocating odor, and is highly toxic, in liquid and solid form, chlorine is a strong oxidizing, bleaching, and disinfectant agent.

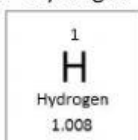

3. Sodium

0

Has a higher boiling point than the original alkane. Low terms are gaseous, middle terms are liquid, and solid for higher terms. It is difficult to dissolve in water, and easily soluble in organic solvents.

4. Hydrogen

0

Is odorless, colorless, and tasteless

5. Chloride

0

Is colorless, odorless, non-metal, single-valent, and a highly flammable diatomic gas.
