NOMBRE: _____ CURSO: _____ FECHA: _____ J. V. _____

LOOK AT THE PICTURE CAREFULLY.

- What is the difference between climate and weather?
 - The climate takes a very long time to change and the weather can change within a few minutes or hours.
 - The elements that affect the climate are temperature, rainfall, the winds and the amount of the water in the air.
 - The climate and the weather are the same because climate is the average weather conditions in a place.
 - The weather takes a very long time to change and the climate can change within a few minutes or hours.
- Your family decides to travel to Nevado del Cocuy. In order to organize the clothes for the trip, the height of the mountain must be taken into account. What is the **climatic factor** that affects your decision?

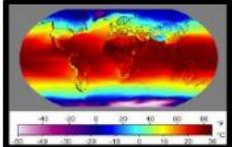

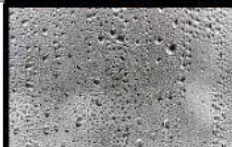

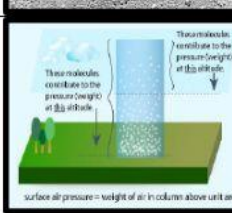

- The altitude.
- The latitude.
- The temperature.
- The humidity.

- Watch the video available in <https://www.youtube.com/watch?v=IJoAcD0oUww>

Draw a poster explaining what climate change is and how it can affect your life.

4. Match the elements of the climate with its corresponding picture:

Temperature	
Atmospheric pressure	
Humidity	
The direction of the winds	
Rainfall	

5. Write a letter to a child in another part of the country. Taking into account the climate of the place where you live, tell him about your house, your diet, the way you dress and the activities you do.

City and date: _____

Dear friend _____,

Sincerely,
