

The human bones song

Calcium	carpals	ulna	sternum	fibula	column	cranium	clavicle	tibia
skeletal	radius	femur	ligaments	humerus	metacarpals	tendons		
phalanges		pelvic girdle						

All your bones inside you

Called thesystem

Giving you strength and structure

So that you won't flop around

And each bone got a function

There are 206 of them

70% of each bone is made from,

start like

The skull The protects the brain

The mandible Jaw chew food, keep teeth in place

TheThe collarbone, there are two of them Links the scapula, sternum, cartilage,
your heart protected, then it's

theFlat bone connects your ribs

Twelve pair of curved arches So lungs and heart are protected

....., bone from your shoulder to your elbow

Forearm has your And on your thumb side, bone

Vertebrates, vertebrates, skeletal bones

Ligaments, and tendons, connect muscles

Blood cell production And storing calcium,

and we're Vertebrates, vertebrates, skeletal bones

..... and, connect muscles

Endocrine controlling Your skeletal system

How bout your hands

The are the bones in your wrist

The are where wrist and fingers connected

....., the small bones in your toes and fingers

And in your foot is also the talus and calcaneus

Vertebral The spine to support standing straight

The cervical The top seven vertebrae

Bottom lumbar Then the thoracic in the middle

And your connects your upper and lower body together

....., your upper leg bone Supporting weight, the strongest, longest and heaviest of all

To protect your knee, small bone, the

The inner thicker, outside is the, and

we're Vertebrates, vertebrates, skeletal bones

Ligaments, and tendons, connect muscles

Blood cell production And storing calcium, and

we're Vertebrates, vertebrates, skeletal bones

Ligaments, and tendons, connect muscles

Endocrine controlling Your skeletal system
