PART 4: READING

Read the text and mark the sentences T (true) or F (false).

LET'S BREATHE CLEAN AIR

On any given day, there are millions and millions of cars on the streets of the world. These cars cause many problems for our planet. If we don't do something about these problems soon, we will not have any fresh air to breathe.

One big problem caused by cars is carbon dioxide. This is a gas that comes out of cars when they burn gasoline. It harms the atmosphere because it leads to smog. Another problem is that the fuel cars run on is running out. Gasoline comes from oil, which is a natural resource that we find in the earth. If we continue to use so much of it, soon there will not be any oil left.

Can we do something to help our planet? Of course we can! One solution is to carpool. This means that people who work at the same place meet up and go to work in one car. Also, we could start taking the bus or the train to go somewhere and not use our cars as often.

If people start doing simple things like the ones mentioned above, we will all be able to breathe the kind of fresh air that people used to enjoy many, many years ago!

e.g., We can't do anything about the problems of our planet. ® *F*

11. Carbon dioxide is bad for the environment. .....

12. Oil comes from the ground. .....

13. There may not be enough gasoline in the future. .....

14. It is not a good idea to use public transportation. .....

15. The air we breathe didn't use to be so polluted. .....
