

Put the process of digestion in order

1.-

2.-

3.-

4.-

5.-

6.-

The chewed food travels down your **oesophagus**.

In the **stomach**, the chewed food turns into a liquid

The rest continues into the **large intestine** where solid waste forms.

In your **mouth**, your teeth cut up and chew food. Your tongue mixes the food with saliva.

Nutrients from this liquid are absorbed into **the small intestine**.

Solid waste leaves the body through **the anus**.
