

Activity 5. Listen and match the sentences in the two columns

THE MAIN CHARACTERISTICS OF LIVING THINGS ARE:

They are born

They eat

They grow

They react

They reproduce

They die

Living things can perceive what is going on around them, and they react to what they perceive.

Living things stop functioning and cease to live.

All living things are born from another living thing.

All living things increase in size during their lifetime. Sometimes they change in appearance.

All living things need food to eat.

Living things can create offspring similar to themselves.
