

## UNIT 4 – READING SECTION

NAME: \_\_\_\_\_ DATE: \_\_\_\_\_

# Eye in the Sky

Satellites are machines in space that circle Earth. They help us talk to people on the other side of the planet. They can also study the planet's weather.

This satellite is called GeoEye 1. It's the same size as a big car. It takes photos of our planet. These photos can show continents and oceans. They can show streets and houses, too!

- 12** **Work with a partner.** Talk about your town.  
You can use a photo or map.

A satellite can see  
an open umbrella  
from space!

This is part of Asia, the biggest continent.  
Now we can see the countries clearly.  
Here we can see South Korea.

Now we can see one town.  
This is Pohang in South  
Korea. Look! Can you see  
the river?
