Complete the song with the words below and then listen to the song to check if your answers are right.

stone	life	footprints	mold	carbon
fossils	bones	cast	amber	info

1. When life leaves us, when they die
   _____ may form in their site
   Gives us _____, how they lived, oh
   Some easy identified
   Like our plants, animals that's why
   They help us tell, how _____ was then

2. When evidence is in the floor
   Fossils deep from life before
   We dig them out, we dig them out
   Fossil records we study
   The kinds of things once living
   They help us tell, how life was then

3. We can work out how they lived
   Learn about all life ancient

4. And how they're forming
   Fossils, fossils
   Animals die-leave their_____
   The sediments then turn to _____
   Fossils, fossils
   Skelton gone now a _____
   The minerals fill- _____ is formed
   Found years after they're gone, gone, gone

5. Fossils form like a statue
   Not all lucky to capture
   They may rot away, after decay
   Right conditions may bury
   Fossilize it's preserving
   Record of the past, a mold and cast

6. The remains of once living
   And sometimes from ones extinct

7. Mold of a bone
   Footprints or burrows
   Insects caught in _____ not moving
   Petrified rock
   Replaced organ parts
   _____ stays making carbonization
   _____ found maybe how feet beating
   How they walked maybe two or four limbs
   Did they herd? Maybe they stampeded
   Found in mines, quarries, even riverbeds

8. Fossils
   Found years after they're gone, gone, gone
   Fossils found years after they're gone, gone, gone
