

找出平均数。

- 1 98 cm, 86 cm, 84 cm, 92 cm

$$(\square + \square + \square + \square) \div \square = \square \div \square \\ = \square$$

- 2 70, 70, 75, 80, 85, 75, 85, 80, 75, 70

$$(\square + \square + \square + \square + \square + \square + \square + \square + \square + \square) \div \square \\ = \square \div \square \\ = \square$$

找出极差。

- 1 36 秒, 12 秒, 49 秒, 51 秒, 28 秒

$$\square - \square = \square$$

- 3 12, 39, M, 70, 29, 18, 75

这组数据的极差是 66, M 是多少?

$$\text{最大值} - \text{最小值} = 66$$

$$\square - \square = 66$$

$$\square = \square - 66$$

$$= \square$$
