

Guided Practice

1. Find $176 \div 16$.

$$\begin{array}{r} \square \square \\ 16 \overline{) 176} \\ \underline{- \square \square} \\ \square 6 \\ \underline{- \square \square} \\ \square \end{array}$$

CHECK: $ \square \square \times \square \square = \square \square \square \square$

So, $176 \div 16 = \underline{\hspace{2cm}}$.
