'Cars cause pollution and should [] from city centers.' What do you think? In the past, people travelled by horse and so city	BAN
centers [] for cars. They were built for riders and pedestrians. The question now is: should we adapt them for cars or should we make city centres car-free zones? Cars cause lead pollution and thousands of children have asthma or suffer brain damages. Cars also cause	NOT DESIGN
noise pollution and can stop people [] .	SLEEP
People [] every day on the roads in car accidents and also in road rage incidents where drivers attack other drivers. It's awful! So why do we have cars? For getting around, of course, and to make it easy to get from one place to another. They carry as much luggage as we want	KILL
and are [] than public transport.	FAST
If we banned cars from city centres, we [] big car parks and then free public transport to our destination. People might walk more and be healthier.	NEED
In the future who [] what will happen? Science may solve the problem. We may have electric or solar-powered cars that know where they are going. Things will certainly be different.	KNOW
