

## FILL IN THE GAPS WITH THE PROPER GRAMMATICAL FORM

### 8

'Cars cause pollution and should  from city centers.' What do you think? In the past, people travelled by horse and so city

BAN

centers  for cars. They were built for riders and pedestrians. The question now is: should we adapt them for cars or should we make city centres car-free zones? Cars cause lead pollution and thousands of children have asthma or suffer brain damages. Cars also cause

NOT DESIGN

noise pollution and can stop people  .

SLEEP

People  every day on the roads in car accidents and also in road rage incidents where drivers attack other drivers. It's awful! So why do we have cars? For getting around, of course, and to make it easy to get from one place to another. They carry as much luggage as we want

KILL

and are  than public transport.

FAST

If we banned cars from city centres, we  big car parks and then free public transport to our destination. People might walk more and be healthier.

NEED

In the future who  what will happen? Science may solve the problem. We may have electric or solar-powered cars that know where they are going. Things will certainly be different.
