Read the text and choose the correct answer:

Deserts are hot and dry places where little or no rain falls. Few plants and animals can live in deserts because there is not enough water for them to drink. Plants in the deserts have long roots that spread out to find water. Some species like cactus have thick stems to store water.

Certain animals have learnt to live in the desert. The elf owl makes its nest in a cactus,and the cactus protects the bird from the hot sun. The spadefoot toad also dislike the sun. Ituses its feet to dig a hole in the ground and goes to sleep. It only wakes up when it starts to rain.

1- What does the word "enough" mean ?

a) little

b) lots of

c) as much as is needed
