by Alain de Botton

The old saying "It's better to travel than to arrive" is usually understood as an attack on destinations rather than a positive statement about travel. Indeed, people are always

complaining about the horrors of travelling: crowded airports, overbooked flights, cancelled and dirty trains. However, I believe there are something unusual pleasures in the journeys we make. Take the aeroplane, for example. Few seconds in life is more exciting than those during take-off. Waiting at the beginning of a runway, we see familiar locations out of the plane window: grass, a road, and modern hotels – the Earth as we have always known it, where we make slow progress even by car. Then suddenly, accompanied by the controlled noise of the engine, we rise smoothly into the sky and a huge space opens up for us, where we can imagine new possibilities in our lives.

Trains are another wonderful travel environment. I love the atmosphere of half-empty carriages making their way across the countryside: enjoying the silence inside and the regular beat of the wheels against the track outside. A train journey can be like a dream, where we become involved in different thoughts and are able to recall distant memories. There's nothing like a moving train to encourage the mind to perform properly. Thinking can even improve when parts of the mind are busy with other tasks, like listening to music or following a line of trees.

If we are attracted to air or train travel despite their disadvantages, it is perhaps because we feel these experiences provide an important alternative to the habits and limitations of our ordinary world.
