Science Test Practice

Label solid, liquid, gas

Its particles stay in the same place.

Its particles move by gliding one another.

Its particles are far apart.

Write the separation method

Separates two liquids which have different “weights”

Separates iron and steel from non-magnetic materials.

Separates soluble solids from liquids.

LIVEWORKSHEETS

A. What are **3 ways** to solve a solid in a liquid? 3 points.

1. _____
2. _____
3. _____

B. Write **1 example** of a solution, then the **solvent** and the **solute.** 3 points.

Solution: _____
Solvent: _____
Solute: _____

C. Write **4 examples** of condensation. 4 points.

1. _____
2. _____
3. _____
4. _____

D. What are **3 parts** of a mixture in a fruit salad? 3 points.

1. _____
2. _____
3. _____

E. Write **3 examples** of a **chemical** change. 3 points.

1. _____
2. _____
3. _____

LIVEWORKSHEETS

F. Write **3 examples** of a **physical** change. 3 points.

1. _____
2. _____
3. _____
