

NAME: _____ DATE: _____

SUBJECT: MATHEMATICS – PAPER II

TOPIC: SIMPLIFYING FRACTIONS

INDEPENDENT PRACTICE

- **Step 1:** Find the factors for the numerator and denominator in each fraction.
- **Step 2:** Divide the numerator and denominator by the greatest factor they have in common - (**reduce to its simplest terms**).
- **Step 3:** Write the new equivalent fraction.

$$\frac{8}{14} \div \underline{\quad} = \underline{\quad}$$

$$\frac{8}{28} \div \underline{\quad} = \underline{\quad}$$

$$\frac{30}{50} \div \underline{\quad} = \underline{\quad}$$

$$\frac{6}{54} \div \underline{\quad} = \underline{\quad}$$

$$\frac{35}{91} \div \underline{\quad} = \underline{\quad}$$
